

EarthBox Garden Student Activity Guide

Explanation of Focus Symbols

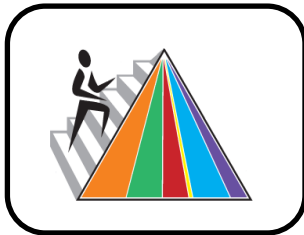

Horticulture

This focus symbol indicates that the activity involves participants working with plants. Skills developed include learning about crop types (warm or cold weather crops), identifying and resolving problems with pests and disease and harvesting. It also includes collection and analysis of crop related data.

Technology

This focus symbol indicates that the activity involves participants using the Internet for communication and research and using computers for data entry and making forms as well as working with graphs and tables.

Health

This focus symbol indicates that the activity involves participants learning about nutrition topics, including vitamins and minerals, the nutritional value of foods, their own personal nutritional needs with some focus on physical fitness.

Workforce Development

This focus symbol indicates that the activity involves participants in the development of workforce skills including team building, presentation skills, marketing, and sales.
